

West I-40 Phase III Diversion Project

Project Currently Under Construction

Project site looking Northeast

**Description** Channel along north side of I-40 with visual amenities from Estancia to Unser Blvd. Includes water quality detention basin for floatable control near Estancia and connection to the existing Parkway Channel. Drains to Rio Grande at West Bluff Outfall at the I-40 bridge.

**Objectives** Provide outfall for drainage basins north of I-40. Provide relief for overloaded portion of Ladera System and cut off drainage under I-40 overloading systems to the south.

**Funding** AMAFCA (lead), City of Albuquerque

**Total Cost** \$5,500,000

**Time Frame for AMAFCA Funding**

FY-05	FY-06	FY-07	FY-08
\$3,800,000
